| 20160311 |  |  |  |
| Part Name 2.6mm x 1.6mm SMD | Part No. | EVPBB4A9B000 | $1 / 8$ |
| Light Touch Switch |  | EVP |  |

1. Notification Items
1.1 Law and the regulation which are applied
(1) Ozone depleting substances specified by Montreal Protocol have not been used in the manufacturing process of the material used in this product.
(2) This product complies with RoHS Directive (on the restriction of the use of certain hazardous substances in electrical and electronic equipment) (2011/65/EU).
(3) The materials used in this product contain only the substances listed in the List of Existing Chemical Substances specified in 'Act on the Evaluation of Chemical Substances and Regulation of Their Manufacture, etc'.
(4) Permission must be obtained from the Japanese government if the product that is subject to the "Foreign Exchange and Foreign Trade Law" is to be exported or taken out of Japan.
1.2 Application Limits

The following shall be described for safety precaution:
[Limitation of Application]

- This product has been designed and manufactured for general electronic devices, such as home electronics, office equipment, information device and communication devices. In an event that this product is used for more sophisticated applications requiring higher safety and reliability and its failure or malfunction of this product may impose damage to human life or property, agreement on product specifications for approval suitable for such applications are required. Such applications shall include the following: aircraft equipment, aerospace equipment, disaster prevention / crime prevention equipment, medical equipment, transportation equipment (vehicles, trains, ships, etc.), information processing equipment that are highly publicized, and other equivalent equipment
- Regardless of its applications, in an event that this product is used for the equipment requiring high safety levels, place protective circuits or redundant circuits and perform safety tests to improve your products safety.
1.3 Handling of reference specification.
- Since the contents of this reference specification are subjected to change without prior notifications, please request us a formal specification again for your investigations before using.
1.4 Manufacturing Sites

The country of manufacture : Malaysia The country of manufacture: China The country of manufacture : Japan

Panasonic Industrial Devices Malaysia Sdn. Bhd. Panasonic Industrial Devices (Qingdao) Co., Ltd.
Input Devices Business Unit, Electromechanical Control Business Division Panasonic Corporation
2. Summary
2.1 This specifications applies to the following types of switch. Push-ON type S.P.S.T
2.2 This specifications is a constituent document of contract for business concluded between your company and Panasonic Corporation.
2.3 Items not particularly specified in this specifications shall be in conformance with JIS Standards.

3. Dimension Marking Circuit diagram

Date code are indicated in the product.

## REFERENCE ONLY

General dimension tolerance : $\pm 0.05$
Odimensions are reference dimensions.

Actuator cross section (Section C-C)

Soldering thickness $t=0.08 \pm 0.01$
*Soldering failure may occur depending on applied solder amount, so, please consider to use our recommended stencil and land pattern desing
$\square \square \square$ :Recommended land pattern area

Х又 : No soldering area
Any land pattern or via holes shall not be
provided at 区XX area
If it's necesary to design land pattern or
via holes at XQ area,
please apply resist to then to protect their
please apply resist to
metal part coepletely.
If their metal parts are not protected
completely, short circuit failure nay occur
by solder ball.
Besides, there should be convexoconcave by
designing additional pattern,
it may cause swin, influence on
fter reflow soldering intrusion
Therefore, please study any influence of
additional land pattern or via holes at $\boldsymbol{\square}{ }^{\text {area }}$ in advance.

### 4.4 Standard conditions

Unless otherwise specified, the test and measurements shall be carried out as follows.

| Ambient temperature | $:$ |
| :--- | :--- |
| Relative humidity | $:$ |
| Atmospheric pressure | $:$ |
| A | $\sim 86 \sim 85{ }^{\circ} \mathrm{C}$ |
| $\sim 106 \mathrm{kPa}$ |  |

However, if doubt arises on the decision based on the measured values
under the above-mentioned conditions, the following conditions shall be employed.

| Ambient temperature | $:$ | 20 | $\pm$ | $2{ }^{\circ} \mathrm{C}$ |
| :--- | :--- | :--- | :--- | :--- |
| Relative humidity | $:$ | 65 | $\pm$ | 5 |
| Atmospheric pressure $:$ | 86 | $\sim 106 ~$ | kPa |  |

## 5. Performance

5.1 Electrical characteristics

| No. | ITEM | TEST CONDITION | PERFORMANCE |
| :---: | :---: | :---: | :---: |
| 5.1.1 | Contact resistance | Push force $:$ \{Operation force $\} \times 2$ <br> Measurement tool $:$ Contact resistance meter <br>   (Capable of $10 \mu \mathrm{~A} \sim 10 \mathrm{~mA})$ | $500 \mathrm{~m} \Omega$ max. |
| 5.1.2 | Insulation resistance | DC 100 V (Between terminals) | $50 \mathrm{M} \Omega \mathrm{min}$. |
| 5.1.3 | Withstand voltage | AC 250 V for 1 minute. (Between terminals) | No insulation destruction |
| 5.1.4 | Bouncing | Operation speed : 3~4 times/s <br> Switch Bouncing Test Circuit | ON <br> 10 ms max. <br> OFF <br> 10 ms max. |

| Classification | REFERENCE SPECIFICATION | Issue No. <br> 20160311 |  |
| :--- | :--- | :--- | :--- |
| Part Name 2.6mm x 1.6mm SMD <br> Light Touch Switch | Part No. | EVPBB4A9B000 | $4 / 8$ |

5.2 Mechanical characteristics

| No. | ITEM | TEST CONDITION | PERFORMANCE |
| :---: | :---: | :---: | :---: |
| 5.2.1 | Operation force | Operation feeling shall be measured after 3 times pre-operations. <br> Pre-operation condition : 3 times, $1 \mathrm{~mm} / \mathrm{s}$ by 6 N Measurement speed : $0.5 \mathrm{~mm} / \mathrm{s}$ <br> Fig. measuring jig | $\begin{aligned} & \text { Push force } \\ & 2.4+{ }_{0}^{0.7} \mathrm{~N} \\ & \text { Return force } \\ & 0.1 \mathrm{~N} \text { min } \end{aligned}$ |
| 5.2.2 | Travel to closure | Travel | $0.11{ }_{-}^{+}{ }_{0.05}^{0.05} \mathrm{~mm}$ |
| 5.2.3 | Click ratio |  | Click ratio $40 \% \mathrm{~min}$. |
| 5.2.4 | Push strength |  | No damage (Electrical and mechanical) |
| 5.2.5 | Vibration test | 1) Amplitude $: 1.5 \mathrm{~mm}$ <br> 2) Sweep rate $: 10-55-10 \mathrm{~Hz}$ for 1 minute <br> 3) Sweep method $:$ Logarithmic frequency <br>   <br>  sweep rate <br> 4) Vibration direction $: X, Y, Z(3$ directions) <br> 5) Time $:$ Each direction 2 hours <br>  (Total 6 hours) | No.5.1 and 5.2.1 to 5.2 .2 shall be satisfied. |
| 5.2.6 | Soldering heat test | Mount the switch on P.W.B by solder paste. <br> 1) Reflow process 2 times. (Refer to section 6.1) <br> 2) Standard conditions after test : 1 hours | Contact resistance $500 \mathrm{~m} \Omega$ max. <br> Click ratio $35 \%$ min. No.5.1.2 to 5.1.4 and No.5.2.1 to 5.2.2 shall be satisfied. |
| 5.2.7 | Solderbility | After spreading flux, the terminal is immersed in solder with following condition. | $95 \%$ or more of surface area(Excluding ruptured surface)where is immersed in solder shall be covered by new solder. |

7. Packing specification

## Carrier tape

| A | B | C | D | E | F | G | H | I | J | K | t |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\pm 0.3$ | $\pm 0.1$ | $\pm 0.1$ | $\pm 0.1$ | $\pm 0.1$ | $\pm 0.1$ | $\pm 0.3$ | $\pm \pm .2$ | $\pm 0.2$ | $\pm 0.2$ | $(10.25)$ | 0.15 <br> -0.1 <br> 12 |

Taping condition : Lack of products in the middle of taping should be one MAX, but total quantity specified in the specifications should be secured.
Peeling off strength of top tape : It should be within 0.2 N to 1 . 0 N at 165 degree in peeling off angle.
Joint of carrier tape : One joint per one reel may exist.

Reel ( $10000 \mathrm{pcs} . /$ reel $)$

| A | в | 0 | 0 | E | F | G |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\phi^{ \pm 280}$ | $\dagger^{ \pm 180}$ | $\stackrel{ \pm 0.5}{\phi 13}$ | ${ }^{ \pm}{ }^{ \pm 1}$ | $\stackrel{ \pm 0.5}{2}$ | 13.5 | 17.5 |

$<$ Prohibitions and precaution for handling $>$
Prohibited items on fire and smoking】
－Absolutely avoid use of a product beyond its rated range because doing so may cause a fire． If misuse or abnormal use may result under conditions in which the product is used out of its rated range，take proper measures such as current interruption using a protective circuit．
－The grade of nonflammability for resin used in product is＂94HB，＂which is based on UL94 Standards（flammability test for plastic materials）．Prohibit use in a location where a spreading fire may be generated or prepare against a spreading fire．

For use in equipment for which safety is requested】
－Although care is taken to ensure product quality，inferior characteristics，short circuits， and open circuits are some problems that might be generated．To design an equipment which places maximum emphasis on safety，review the effect of any single fault of a product in advance and perform virtually fail－safe design to ensure maximum safety by：
－Preparing a protective circuit or a protective device to improve system safety，and equipment．
－Preparing a redundant circuit to improve system safety so that the single fault of a product does not cause a dangerous situation．

Attentions required for storage condition】
－When this product is to be stored in the following circumstances and conditions，it may affect on the performance deteriorations and solderability etc．，avoid storing in the following conditions．
（1）A place where the temperature is $-10^{\circ} \mathrm{C}$ max．，$+40^{\circ} \mathrm{C}$ min．and the humidity is $85 \% \mathrm{~min}$ ．
（2）In the corrosive gas atmosphere．
（3）Long－term storage for 6 months min．
（4）A place where the product is exposed to direct sunlight．
－Store in packed condition so that the load stress is not applied．
－Please use this product as soon as possible，our recommendation is within 3 months and the limitation is 6 months．
－If any remainder left after packing is opened，store it with proper moistureproofing and gasproofing，etc．，
