## Medically Approved Ultra Low Noise Power Supply

Ultra-high efficiency 1U size

### PLUG & PLAY POWER next generation power solution

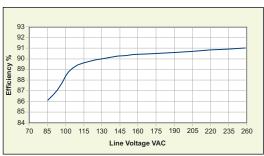

#### **FEATURES & OPTIONS**

- · Low Acoustic noise 38.3dBA
- EN60601-1 3rd edition Approved
- Less than 300µA leakage current
- 150µA option available
- · 4000VAC isolation
- Ultra high efficiency, up to 89%
- Extra low profile: 1U height (40mm)
- Plug & Play Power allows fast custom configuration
- · Individual output control signals
- All outputs fully floating
- · Series / Parallel of multiple outputs
- Few electrolytic capacitors (all long life)
- · 5V bias standby voltage provided
- Standard Xgen product options include: Conformal Coating, Low Acoustic Noise, Low Leakage Current, Extra Ruggedisation, Connector, Cabling & Mounting options, Thermal Signals and Reverse Fans. See Section 4.10 for more information

#### **APPLICATIONS INCLUDE**

- Clinical diagnostic equipment
- · Medical lasers
- · Dialysis equipment
- · For Standard applications see XB

#### **EFFICIENCY** (typical)

The XW family of medically approved Ultra Low Noise power supplies provides up to 800W in an extremely compact 1U package. Providing up to 12 isolated DC outputs, the XW family employs innovative plug & play architecture allowing users to instantly configure a custom power solution in less than 5 minutes!

The XW family consists of 3 *powerPacs* ranging in power levels from 400W to 800W peak and 7 *powerMod* DC output modules. Simply select the appropriate *powerPac* and up to 6 *powerMods* from the tables below to complete your custom power supply.

The XW family boasts ultra-high efficiencies (up to 90%). The significant system space savings and reduced heat dissipation radically simplify system design.

All configurations carry full safety agency approvals including UL60601-1, EN60601-1 3rd Edition and are CE marked.

#### NOTES

Vibration

- 1. This product is not intended for use as a stand alone unit and must be installed by qualified personnel.
- 2. The specifications contained herein are believed to be correct at time of publication and are subject to change without notice.
- 3. When powering inductive or capacitive loads, it is recommended to use a blocking diode on the output.
- 4. All specifications at nominal input, full load, 25°C unless otherwise stated.
- 5. For section references above go to the Xgen Designers Manual.

#### **Xgen Flexibility and Signals**

For detailed information please refer to the Xgen Designers' Manual which is available on-line or contact Excelsys.

#### **Voltage Adjustment**

Output voltage can be adjusted in a number of ways:

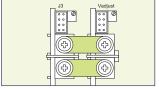

- 1. On board multi turn potentiometer
- 2. Remote resistive programming (via Vtrim pin)
- 3. Remote voltage programming (via Vtrim pin)

#### **Current Limit Adjustment**

Output current limit can be Straight line or Foldback and can be adjusted via Itrim pin.

#### **Parallel Connection**

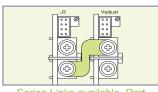

To achieve increased current capacity, simply parallel outputs using the standard parallel links.

Parallel Links available to order.
Part Number XP1

#### **Series Connection**

To achieve increased output voltages, simply series outputs using standard series links, paying attention to the requirements to maintain SELV levels if required in your system.

Series Links available. Part Number XS1

#### **Remote Sensing**

When the load is remote from the power supply, the remote sense pins may be used to compensate for drops in the power leads. Where the power cabling contributes significant dynamic impedance, see Xgen series Designers' Manual.

#### **Bias Voltage**

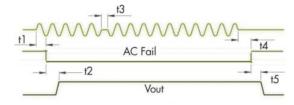

A SELV isolated bias (always on) voltage of 5V @ 250mA (30mA on XCE and XVE models) is provided on J2 pin 2 relative to J2 pin 1 (common) and may be used for miscellaneous control functions. 5V @ 500mA available on request.

#### Inhibit/Enable

Inhibiting may be implemented either globally or on a per module basis (powerPac or powerMod inhibiting). Reverse logic (enabling) may also be implemented.

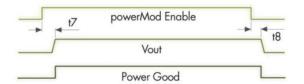

#### AC Fail

Open collector signal indicating that the input voltage has failed or is less thant 80Vac. This signal changes state giving 5ms of warning beore loss of output regulation.

#### **Power Good**

Opto-isolated output signal indicates that the *powerMod* is operating correctly and output voltage is within normal band.

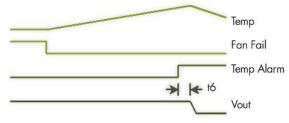

#### powerPac Options

#### **Temperature Alarm (Option 01)**

Open collector signal indicating that excessive temperature has been reached due to fan failure or operation beyond ratings. This signal is activated at least 10ms prior to system shutdown.

#### Fan Fail (Option 01)

Open collector signal indicating that at least one of the *powerPac* fans has failed. This does not cause power supply shutdown. The power supply will continue to operate until 10ms after the temperature alarm signal is generated.

#### Reverse Fan (Option 02)

The Xgen series is available with reverse air flow direction. Contact Excelsys for derating details.

#### **Ultra Low Leakage current (Option 04)**

The Xgen is available with the option of Ultra Low Earth Leakage Current of <150 $\mu$ A and is approved to EN60601-1 and UL60601-1 2nd and 3rd Editions.

#### **Conformal Coating (Option C)**

Xgen is available with conformal coating for harsh environments and MIL-COTs applications.

#### Ruggedised Option (Option R)

Xgen is available with extra ruggedisation for applications that are subject to extremes in shock and vibration.

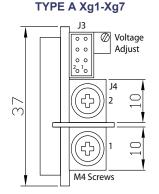

#### Input cable Option (Option D)

3 Wire input mains cable. Input cables are 300mm in length and come supplied with fast on connectors.

#### **Signal Connector Pinout**

#### **Xgen Product Selector**

The Xgen series of user configurable power supplies with its unique plug and play architecture allows system designers to define and build 'instant' custom power solutions with industry leading 17W/in<sup>3</sup> power density and up to 90% efficiency.

#### Xgen powerPacs

The application specific 4 slot and 6 slot *powerPacs* provide up to 12 isolated DC outputs from 200W up to 1340W. The table below summarises the *powerPacs* by application and power level. Please refer to the specific product datasheets for full specifications.
